# Conceptdocument – Portfolio

Angelina Coffie

I want to practice my development skill so that's why I will be making my own portfolio website to show the projects I'm working on and the learning outcomes.

---

**Theme: Spanish**

For this portfolio is chose the Spanish theme. I asked someone for ideas to use for my portfolio and the person came up with Spain.

**Vision and Concept.**

I want a little of Spain to be visible with certain elements that you see in the Spanish culture. For example: rounded doorways, dots that are on the dresses of the flamenco dancers and a Spanish background music.

**Design and Style**

Color palette: # FFF6FD #FF8FEA # EB2DC8

Fonts: Yeseva one, Playfair Display and Poppins.

Images:

Spanish tiles as buttons

**Content and Pages**

- **Homepage**
  A homepage where you can navigate to the About Me, projects and Learning Outcomes.
- **About Me**
  A little about myself
- **Projects**
  The branding fase
  The client project
  The Passion Project
  Portfolio
- **Learning Outcomes**
  The evidence to every learning outcome

**Resources & Technology**

I am coding the website with VS Code and made the design in Figma.

A goal of mine is to add animations to the portfolio.
